A NOTE FROM THE EDITOR

"We're all going on a Summer holiday..." August marks the long break for pupils, students and teachers across the UK and it's anticipated that millions of us will be jetting off on holiday for sand, sea, swimming pools, sangria and sunbeds – especially after all the limitations that were placed on us during the last two Summers. One of the many benefits of the Summer is the positive effect that it has on many people's mental health. The sun gives us more vitamin D, which raises energy levels and just simply makes us feel happier. So there's no excuse for not getting out and about in the sunshine (safely, of course)!

There are a couple of articles in this magazine, both encouraging us to make positive changes in our every day life to preserve the world we are living in by the way we shop and eat and by supporting our wildlife, starting with our own back garden. Plenty of events are taking place this Summer, as well as regular meetings resumed by your local charitable organisations: see p.18-19 for more. Our fleet of advertisers are all trusted local experts in their field and bring years of experience along with the quality product or service they provide. Please remember to mention Stonesthrow Directories when calling, so we can introduce you to more local talent, offers and discounts available exclusively to our magazine readers.

Whatever August and September have in store for you, we hope you manage to have at least a short break away from your routine and spend some time in the sun. Even if you can't take a plane to somewhere warm and exotic, our region is abundant with beautiful and inspirational places where you can relax, get up close and personal with nature, and feed your body and soul.

Here is the date of this year's last Bank Holiday:

29th August - Summer Bank Holiday.

Have a great couple of months and whatever you do - keep yourself and your loved ones safe.

Yours, Stonesthrow Publications

Misty Double Glazing?

Hi, my name is Dave Millidge, let me introduce my company where I repair windows and replace misted up double glazed units.

The area that I cover is Coventry and Warwickshire. You may have seen me around in your street or even have family and friends who I have worked for in the past ten years, with over 6,000 satisfied customers during that period. I started Misty to Clear to give customers the best value repairs in the current climate.

The Misty to Clear website allows total transparency of the customer experience. You can log into the website and view work that I have carried out. You can also leave feedback on social media. Therefore, I give a 5 year guarantee on all new double glazed units fitted by Misty to Clear.

This is a genuine guarantee which does not come as an extra to my price.

I started Misty to Clear mindful that the cost of repairs is probably key to most people's budget when using tradesmen to do work on their behalf in their homes.

I offer a lower cost service to both old and new customers as I operate directly for the customer with no additional hidden charges or insurance costs to you the customer.

So, my company name is Misty to Clear where I can offer steamed up window glass replacement and fix broken handles, hinges, seals, window locks and door locks.

I also change glass in Velux windows too.

Satisfaction guaranteed to be a high standard that carries a 5 year guarantee.

Clearly a great service!

SAVE THE PLANET

ONE BIRD AT A TIME

Imagine no bird song, no sight of busy birds building nests, feeding their young, or splashing in a small puddle.

Our bird population is experiencing a rapid decline...there has been an 89% drop in numbers since 1967, and previously common birds such as sparrows, chaffinches, starlings, skylarks, thrushes, yellowhammers are all on the red list for decline.

We have lost over 69% of house sparrows since 1970!

WHY IS THIS HAPPENING?

Farming practices, such as grubbing out hedges, ploughing to the very edge of fields, increasing use of pesticides...no insects ...no birds.

Building of houses and roads and loss of green space.

Places to shelter and nest is another factor. We take the land to build on but fail to understand the then even greater need to grow hedges, trees, dense shrubs and bushes, so birds have shelter and safe places to nest.

More people about, more domestic cats, disturbance of birds generally.

DOES IT MATTER?

What do birds really do for us?

Birds control insect pests. A single breeding pair of bluetits with up to 10 fledglings need to catch about 10,000 small green caterpillars during the time the babies are in the nest (around 3 weeks).

One brilliant pest control agent!

They protect our crops, our trees and our

gardens.

Birds eat our aphids, ticks, beetles, mosquitoes, mice, slugs and snails.

Birds act as a vital suppressor of insect pests, a critical part of our eco structure.

The larger birds will take a mouse, and owls are masters of mice control! They may well eat 2 to 3 mice a night.

Birds eat seeds, so control our weed population.

Plant food. Bird droppings fertilize the soil.

Health. Bird song is known to reduce stress and blood pressure.

HOW CAN WE HELP THEM?

Plant shrubs, trees and hedges, to provide shelter, insect food, and nesting sites. Rowan and crab apple trees, cotoneasters, honeysuckle, holly, sunflowers to name but a few that provide berries and seeds.

Never trim hedges between March 1st to September 1st. It is illegal to disturb nesting birds, their eggs or young.

Avoid covering your garden with decking or gravel. No bird ever found its breakfast worm in our decking!

Put up nesting boxes, at over 5 to 15 feet up, not in strong sun or wind.

Leave out shallow dishes of water for the birds to bathe in...it helps to keep feathers clean and so enables birds to fly well. Keep the water clean, never more than 2 inches deep, and with a stable stone in the water for a bird to stand on.

Avoid all insecticides

You can provide suitable food, but be consistent, birds become reliant on our easy meals. Some will even wait at the set time for you to come, but do ensure it is not close to bushes that cats can hide in!

OUR REWARD is insect and mouse control. Yes, but find me the person who doesn't love the sight and sound of birds!

WHY WE SHOULD EMBRACE EATING LOCALLY GROWN FOOD

IT'S HEALTHIER FOR YOU AND BETTER FOR THE ENVIRONMENT

The role of the food we eat has come into the spotlight in addressing climate change, and it is now evident that we must do more to help global efforts by adapting our shopping and eating habits. More than half of our food now comes from abroad, mainly the EU, South America and South-East Asia. The further food travels, the greater the carbon footprint, and the greater the impact on the environment.

Local food is now a mainstream trend, with more and more people seeking out local options for fresh produce and other goods. But what qualifies as “local” food? And how big an impact does eating local food have on your health and the planet?

There is no legal definition of “local”, but the Campaign to Protect Rural England defines “local” as within 30 miles of where you live. But for some people, “buying local” is more about the values of small-scale and community-based producers than about a specific geographic configuration.

But why buy local food? Some commentators point to the drawbacks: the limited range of options, its often more expensive, and fresh products have a shorter shelf life. But there is an increasing demand from consumers to be told where our food comes from and the practices of the farmers that grow and produce it.

Buying locally has a wide range of benefits:

IT'S BETTER FOR YOUR HEALTH

Local foods often retain more nutrients because local produce is allowed to ripen naturally, while food that travels long distances is often picked before it's ripe. Choosing fruits and vegetables grown in season may also be healthier. For example, when researchers compared the vitamin C content of broccoli grown in season with broccoli imported out of season, they found the latter had only half the vitamin C.

IT'S BETTER FOR THE ENVIRONMENT

Food is one of the leading drivers of climate change. Eating more local food reduces CO2 emissions by reducing food miles — the distance food travels from farm to consumer. The Wildlife Trust estimates that if all our food came from within 20km of where we live, we could save £1.2 billion every year in environmental and congestion costs. Buying locally also means less packaging is used to keep food fresh and saleable, plus less plastic packaging means less waste getting into our seas and harming our wildlife.

IT'S BETTER FOR THE LOCAL ECONOMY

A recent report on the benefits of local food by the New Economics Foundation estimated that for every £1 spent in the local food network Growing Communities in London, a further £3.70 is generated in social, economic and environmental value. When you choose to buy locally grown food you are supporting a diverse food economy as well as creating jobs in farming and food production.

Shopping locally became a big thing during the pandemic, with nearly two-thirds of consumers in the UK rediscovering the High Street. Let's keep the trend alive!
